## Checkpoint Location Overview

Walking route ----- Pump House route ----- Tall Mill route -----

## UPTON FAMILY WALK 2019

## Event Details

### Event Details:

We plan to be at Upton Village Hall Cargate Lane, Upton from 8.00 am Sunday 19<sup>th</sup> May. Walk starters are 9.00am to 10.00am but there will be stragglers I am sure, but should be finished by 2pm latest, probably earlier.

## Raynets involvement and duties

This exercise is to provide communications support to the Rotary International, The operating frequency is expected to be 144.650MHz, using club call sign **MONRX/A**.

Comms will be provided at 2 check points and control at Upton Village Hall, Details of all locations, timings and operators on the following pages.

As only two Check Points plus control need to be manned, this gives plenty of scope for people to move around the route and practice message handling and passing.

If you are planning to go direct to your Control Point please let control know prior to the event and call in on 144.650 when in the area to establish Comms. Please advise if you have a mobile phone signal from your location on arrival, primary communication will be via RF, **if you are going to use CBR (Cross Band Repeat), please advise Mike G8EEY, and Bob G8SDU, [e-mail](#), to prevent interference on the talk through system, prior to the event.** Phones may be needed for emergencies.

The event emergency number is **07493 071632**, only to be used by us as a last resort.

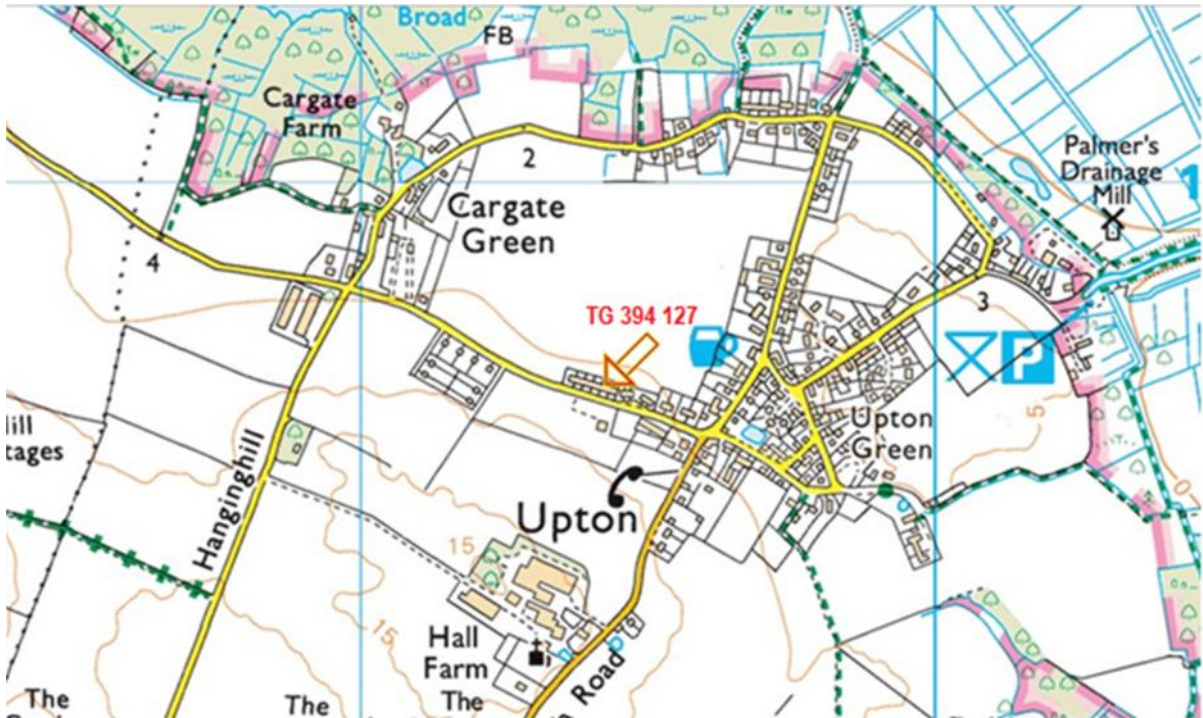

Members not allocated a location will be used to relieve those out on checkpoints for welfare breaks and / or training with message passing and handling.

Take warm clothing and facilities for hot drinks, no mugs will be provided by the organiser.

## Control Location

Cargate Lane, Upton

Upton Village Hall

To be Manned from 08:00 Sun
