JOC N Walsham G7RNN G4PSH Terry

JOC Great Yarmouth G7VAH Steve

N Norfolk DC Cromer M0CNP David. Access to Building not yet confirmed.

S Norfolk Council Office Long Stratton G7KBF Stuart.

Instructions:

As discussed at (Aylsham Caravan) Controllers meeting.

The purpose of the Exercise is to test communications between the locations as listed above only. Bill will control the net at County Hall and give a general call informing all that only User Services Controls are taking part in this Exercise.

Then call in each station on the list in turn to make radio checks with all stations on the net, when each station completed hand back to Control.

This exercise is not for ALL RAYNET Members but if we have time at the end of the exercise Bill will give a CQ-call to anyone else who is QAP on the net and let that station have radio check with stations on net or Control may also make it a 'Freenet' if he so wishes.

If we have time Stations can QSY to 70cm or other RAYNET Freq, but again it's at the discretion of the Controller but the primary roll is Radio Checks on 144.650 first.

Log R/S reports are to be sent to the Controllers and a copy to Terry G4PSH who will do a de-brief and send to all who appear on the Dist list below.

A thanks to EPOs and JOCs for giving RAYNET access to the buildings out of office hours.
